- Constraint-Based Support for Collaboration in Design and Construction, 110
- Improvement of GPS Relative Positioning Accuracy by Using SNR, 1202
- Inelastic Dynamic Response of Structures Using Force Analogy Method, 374
- Multiquadric Solution for Shallow Water Equations, 696

Algorithms

- New Approach to Water Distribution Network Calibration, 727
- Novel Approach to Pavement Cracking Detection Based on Fuzzy Set Theory, 139
- Priority Preserving Unit Penalties in Network Flow Modeling, 1308
- Procedure to Extract Ritz Vectors from Dynamic Testing Data, 1181
- Simulation of Water Networks Containing Controlling Elements, 1304
- Total Least Squares Spiral Curve Fitting, 1200

Alignment

- Approximate Perspective Design of Roads, 1243
- GIS Platform for Multicriteria Evaluation of Route Alignments, 1223
- Optimum Vertical Curves for Highway Profiles, 1199
- State of the Art of Highway Geometric Design Consistency, 1242

Alkalinity

- Durability of AR Glass Fiber Reinforced Plastic Bars, 143
- Modeling of Thermomechanical Effects of Alkali-Silica Reaction, 286

Allowable stress design

- Moment Amplification Factor for P- δ Effect of Steel Beam-Column, 1054

Alloys

- Stretch Bending of Aluminum Extrusions: Effect of Geometry and Alloy, 276

Alluvial channels

- Bed-Form Geometry in Sand-Bed Flows, 768
- Calculation of Bed Changes In Mountain Streams, 669
- Equilibrium Near-Bed Concentration of Suspended Sediment, 770
- Modeling Sediment Transport Using Depth-Averaged and Moment Equations, 769
- Stability and Mobility of Sand-Bed Channels Affected by Seepage, 889
- Turbulence and Secondary Flow over Sediment Stripes in Weakly Bimodal Bed Material, 690
- Velocity and Concentration Distributions in Sheet Flow above Plane Beds, 658

Alluvial fans

- Liquefaction and Soil Failure during 1994 Northridge Earthquake, 581

Alluvial streams

- Movable Bed Roughness in Alluvial Rivers, 776
- Reduction of Local Scour around Bridge Piers Using Slots and Collars, 774

Alluvial valleys

- Earthquake Ground Motion and Structural Response in Alluvial Valleys, 580

Alluvium

- Deep Jet-Grouted Cut-Offs in Riverine Alluvia for Ertan Cofferdams, 555

Aluminum

- Nonperfect Aluminum Beams Subjected to Concentrated Loading, 1130
- Resistance of Welded Aluminum Alloy Plate Girders to Shear and Patch Loading, 1133

1999 ASCE TRANSACTIONS

- Rotational Capacity of Aluminum Beams under Moment Gradient. I: Experiments, 1131
- Rotational Capacity of Aluminum Beams under Moment Gradient. II: Numerical Simulations, 1132
- Stretch Bending of Aluminum Extrusions: Effect of Geometry and Alloy, 276
- Stretch Bending of Aluminum Extrusions: Effect of Tensile Sequence, 292

Amplification

- 3D Analysis of S-Wave Propagation in Soft Deposits, 611
- Amplification Effects of Soil Stratification on Ground Stress Waves, 597
- Moment Amplification Factor for P- δ Effect of Steel Beam-Column, 1054

Anaerobic digestion

- Kinetics Effects on Preferential Struvite Accumulation in Wastewater, 490

Anaerobic processes

- Interactions of Methanogens and Denitrifiers in Degradation of Phenols, 409
- Neural Fuzzy Modeling of Anaerobic Biological Wastewater Treatment Systems, 538
- Removal of Heavy Metals and COD by SRB in UAFF Reactor, 465

Analysis

- Analysis of Road Surface Profiles, 1211
- Analytical Solution for Axial Point Load Strength Test on Solid Circular Cylinders, 395
- Convective Mass Transfer onto Multiple Gas Bubbles, 478
- Design and Implementation of Versatile Beam Analyzer, 113
- Flexural Strength Assessment of Steel Fiber Reinforced Concrete, 963
- General Third-Order Solutions for Irregular Waves in Deep Water, 325
- Generic Methodology for Analyzing Delay Claims, 216
- Horizontally Curved Steel I-Girders State-of-the-Art Analysis Methods, 63
- Hydrodynamic Performance of Wave-Driven Artificial Upwelling Device, 320
- Simplified Analysis Method for Slab-on-Girder Highway Bridge Decks, 1035
- Simplified Girder Analysis, 1112
- Window Analyses of Compensable Delays, 177

Analytical techniques

- Analytical Description of Pinching, Degrading Hysteretic Systems, 254
- Analytical Determination of Pollutant Wash-Off Parameters, 520
- Analytical Method for Designing and Analyzing 1D Search Programs, 639
- Analytical Model of Curved I-Girder Web Panels Subjected to Bending, 85
- Analytical Modeling of Nitrogen Dynamics in Soils and Ground Water, 884
- Fault Tree Analysis of Bridge Failure due to Scour and Channel Instability, 831
- Finite Displacement Behavior of Curved I-Girder Webs Subjected to Bending, 86

SUBJECT INDEX

In-Plane Behavior of Structural Clay Tile Infilled Frames, 1094
Moment-Rotation Hysteresis Behavior of Top and Seat Angle Steel Frame Connections, 1120
Simplified Expressions for Spatial Moments of Ground-Water Contaminant Plumes, 826
Anchor bolts
Calculating Service Moment Capacity of Anchor Bolt-Ed Connections, 1397
Anchorage
Mixed Formulation of Bond-Slip Problems under Cyclic Loads, 1102
Suspension Bridges Unplugged, 1439
Anchors
Formulas for Ultimate Load Capacities of Plane and Axisymmetric Headed Anchors, 384
Self-Anchored Suspension Bridges, 78
Size Effect Analysis for Pullout Strength under Various Boundary Conditions, 248
Weighing Anchors, 1414
Anemometers
Turbulent Velocity in Flocculation by Means of Grids, 428
Angle section
Experimental Study on Bolted Unstiffened Seat Angle Connections, 1162
Animation
Building Design Services in a Distributed Architecture, 109
Anisotropic materials
Elastodynamic Analysis of Antiplane Anisotropic Interface Cracks, 337
Anisotropic plates
Design Optimization Procedures for Fiber Reinforced Plastic Bridge, 356
Strain Factor Ratio Criterion for Crack Extension in Anisotropic Plates, 242
Anisotropic soils
Boundary-Layer Theory for Anisotropic Seabed Response to Sea Waves, 1350
Anisotropy
Elastic Anisotropy of Tire Shreds, 577
Stress-Induced Anisotropic G_{max} of Sands and Its Measurement, 612
Application methods
LEPA and Spray Irrigation for Grain Crops, 865
Approximation
Analytical Method for Designing and Analyzing 1D Search Programs, 639
New Approximations for SORM—Part I, 237
New Approximations for SORM—Part II, 238
Approximation methods
Approximate Convection-Diffusion Equations, 797
Approximate Perspective Design of Roads, 1243
New Approximations for Reliability Integrals, 285
Nonlinear Kinematic-Wave Model for Predicting Open-Channel Flow Rate, 732
Point Estimate Method as Numerical Quadrature, 616

Arid lands

Probabilistic Solutions to Nonlinear Random Ship Roll Motion, 298
Simple Approximations for Improving Second-Order Reliability Estimates, 301
Total Least Squares Spiral Curve Fitting, 1200
Aquatic habitats
Geometry of Scour Holes Associated with 90° Spur Dikes, 741
Aquatic plants
Stratification in Laboratory Simulations of Water Hyacinth Ponds, 446
Aqueducts
Pipe Up, 1423
Aquifer characteristics
Subsurface Characterization Using Artificial Neural Network and GIS, 126
Aquifers
Analytical Ground-Water Flow Solutions for Channel-Aquifer Interaction, 869
Development of Management Models for Sustainable Use of Coastal Aquifers, 859
Development of Multiobjective Management Models for Coastal Aquifers, 1294
Estimation of Hydraulic Diffusivity in Stream-Aquifer System, 855
Interpretation of LNAPL Thickness Measurements under Unsteady Conditions, 793
Nitrate Dynamics Under Cyclic Irrigation Pumpage, 875
Seepage Face Modeling for a Large-Diameter Well in an Unconfined Aquifer, 812
Simulation of Spring Management with Quasi-Aggregated Model, 786
Subsurface Characterization Using Artificial Neural Network and GIS, 126
Arches
Behavior of Pair of Leaning Arch-Shells under Snow and Wind Loads, 311
In-Plane Buckling and Design of Steel Arches, 1170
Arching
Arching of Masonry Infilled Frames: Comparison of Analytical Methods, 1405
Architects
Imposing ISO 9000 Quality Assurance System on Statutory Agents in Hong Kong, 200
Architectural engineering
Managing, Processing and Communicating Information: What A/E/C Organizations Should Know, 920
Architecture
Concerns with Safety in Design/Build Process, 44
Areal
Comparing Mean Areal Precipitation Estimates from NEXRAD and Rain Gauge Networks, 792
Arid lands
Adjusting Temperature Parameters to Reflect Well-Watered Conditions, 848
Behavior of Unsurfaced Airfields Supporting Operations of C-17 Aircraft, 1214
Regional Analysis of Convective Storms in Arid Zone of Southern Hemisphere, 818

Arid lands

Shrinkage of Concrete Exposed to Hot and Arid Climate, 947

Vadose Zone Flow and Transport in Cracked Heavy Textured Soil, 860

Aromatic hydrocarbons

Adsorption on Carbon and Zeolite of Pollutants from Flue Gas during Incineration, 512

Effect of Acidogenic Stage on Aerobic Toxic Organic Removal, 460

Extraction Method for Analysis of PAHs in Coal-Tar-Contaminated Soils, 1387

Kinetics for Biodegradation of Polycyclic Aromatic Hydrocarbons, 1372

PAHs in Sediments: Unmixing and CMB Modeling of Sources, 524

Temperature Effects of Trickle-Bed Biofilter for Treating BTEX Vapors, 495

Arsenic

Removal of Arsenic from Ground Water by Manganese Dioxide-Coated Sand, 497

Artificial intelligence

Analysis of Masonry Panel under Biaxial Bending Using ANNs and CBR, 128

Using Machine Learning and GA To Solve Time-Cost Trade-Off Problems, 208

Artificial recharge

Predicting Infiltration and Ground-Water Mounds for Artificial Recharge, 822

ASCE Awards & Prizes

 - Measurement of Complex Permittivity of Asphalt Pavement Materials, 1247

SUBJECT INDEX

Conservation

Concretes

Laboratory Evaluation of Concrete Mixture Designs Employing Type I and Type K Cement, 957

Shrinkage of Concrete Exposed to Hot and Arid Climate, 947

Conditional probability

Directing Exploration with 3D FEM Sensitivity and Data Uncertainty, 632

Gray Evaluation Method of Concrete Pavement Comprehensive Condition, 1271

Martingale Approach to Monte Carlo Simulation and Linear Random Vibration, 401

Ranking Procedure on Maintenance Tasks for Monitoring of Embankment Dams, 564

Using Conditional Probability to Find Driver Age Effect in Crashes, 1265

Conduits

Microtunneling Technology for Conduit Construction, 1399

Cone penetration tests

Determination of Pile Base Resistance in Sands, 604

Effects of Placement Method on Geotechnical Behavior of Hydraulic Fill Sands, 622

Random Field Modeling of CPT Data, 585

Reliability-Based Method for Assessing Liquefaction Potential of Soils, 605

Statistical to Fuzzy Approach Toward CPT Soil Classification, 558

Vision Cone Penetrometer for Direct Subsurface Soil Observation, 16

Confidence limit

Neural Networks Based Decision Support in Presence of Uncertainties, 1316

Configuration

New Configuration of Lateral Steel for RC Columns, 1406

Confinement

Behavior of HSC Filled Tube Columns under Dynamic Compressive Loading, 1150

Circular High-Strength Concrete Columns under Simulated Seismic Loading, 1060

Confinement Model for High-Strength Concrete, 1061

Crack Width of High-Performance Concrete Due to Restrained Shrinkage, 966

Factors Affecting Mechanical and Creep Properties of Silicate-Grouted Sands, 624

FRP-Confined Concrete Model, 159

Investigation of Factors Affecting Vertical Drain Behavior, 562

New Configuration of Lateral Steel for RC Columns, 1406

Strength and Ductility of Hybrid FRP-Concrete Beam Columns, 1148

Conical bodies

Buckling Design of Stringer-Stiffened Conical Shells in Compression, 1034

Simple Design Procedure for Liquid-Filled Steel Conical Tanks, 1128

Connections

Behavior and Modeling of Wood-Pegged Timber Frames, 1029

Calculating Service Moment Capacity of Anchor Bolted Connections, 1397

Compound Size Effect in Composite Beams with Softening Connectors. I: Energy Approach, 389

Concrete Connections, 1416

Effectiveness of Anticheck Bolts in Split Ring Connections Repair, 1006

Experimental Comparisons of Connections for GFRP Pultruded Frames, 144

Failure In-the-Row Model for Bolted Timber Connections, 1107

Finite-Element and Simplified Models of GFRP Connections, 1113

Further Tests of Beam-to-Column Connections for Pultruded Frames: Flange-Cleated, 155

Further Tests on Beam-to-Column Connections for Pultruded Frames: Web-Cleated, 142

Investigation into Cause of Failure of Lift Control Panel, 1003

Making the Connection, 1450

Moment-Rotation Hysteresis Behavior of Top and Seat Angle Steel Frame Connections, 1120

Moment-Rotation-Temperature Characteristics of Steel/Composite Connections, 1160

Nonlinear Punching Shear Failure Model for Interior Slab-Column Connections, 1139

Rate-of-Load and Duration-of-Load Effects for Wood Fasteners, 1108

Screwed Connection Tests of Thin G550 and G300 Sheet Steels, 1043

Connections, bolted

Experimental Study on Bolted Unstiffened Seat Angle Connections, 1162

Find the Right Bond, 1441

Fracture Modeling of Bolted Connections in Wood and Composites, 984

Inelastic Behavior and Design of Steel Panel Zones, 1050

Mathematical Model for Relaxation in High-Strength Bolted Connections, 1119

Connections, joints

Elastomeric Adhesives in Wood Connections: Short-Term Behavior, 973

Connections, welded

Experimental Study of FRC-Encased Steel Joist Composite Beams, 1083

Fracture Strength of Welded Flange-Bolted Web Connections, 1092

Minimum Weight Design of Fillet Welds Using Convex Formulation, 304

Seismic Reliability of Special Moment Steel Frames with Welded Connections: I, 1069

Seismic Reliability of Special Moment Steel Frames with Welded Connections: II, 1070

Connectors, mechanical

Combined Loads on Sheathing to Framing Fasteners in Wood Construction, 43

Shear Connector Requirements for Embedded Steel Sections, 1045

Conservation

Evaluation of Advective Schemes for Estuarine Salinity Simulations, 649

Consistency

Consistency

Prediction of Asphalt Rheological Properties Using HP-GPC, 939

Consolidation

Coefficient of Consolidation by Inflection Point Method, 610

Continuum Bed Model for Estuarine Sediments Based on Nonlinear Consolidation Theory, 674

Prefabricated Vertical-Drain Test Section in Craney Island Dredged Material Management Area, 987

Probabilistic Design Method of Prefabricated Vertical Drains for Soil Improvement, 602

Solution Charts for Finite Strain Consolidation of Normally Consolidated Clays, 623

Three Stages of Consolidation Dewatering of Sludges, 516

Constitutive models

General Kinematic-Isotropic Hardening Model, 287

Modeling of Thermomechanical Effects of Alkali-Silica Reaction, 286

New Approach to Strain Rate Sensitivity of Concrete in Compression, 402

Nonlinear Ground Response at Lotung LSST Site, 559

SSI Effects on Ground Motion at Lotung LSST Site, 614

Strain-Rate-Sensitive Constitutive Law for Concrete, 403

Constitutive relations

Flexural Behavior of SFRC: Testing and Modeling, 982

Mechanics of Damage and Constitutive Relationships for High Strength Concrete in Triaxial Compression, 229

Numerical Model of Sedimentation/Thickening with Inertial Effects, 498

Constraints

Constraint-Based Support for Collaboration in Design and Construction, 110

Cost-Effective Allocation of Research Funds for Emerging Technologies, 1019

Local Buckling of Side-Plated Reinforced-Concrete Beams. I: Theoretical Study, 1098

Local Buckling of Side-Plated Reinforced-Concrete Beams. II: Experimental Study, 1099

Nonlocking Beam Finite Elements for Use with Inelastic Material Models, 245

Reversing Direction of Transportation Planning Process, 1233

Topology Optimization for Structures with Frequency Constraints Using an Evolutionary Method, 1186

WorkPlan: Constraint-Based Database for Work Package Scheduling, 184

Constructibility

Constructibility Test for Cold In-Place Asphalt Recycling, 205

Constructibility Issues for Highway Projects, 917

Incorporating Maintainability in Constructibility Review Process, 932

Project Management and Good Technical and Business Practices, 919

Seismic Design and Constructibility of RCS Special Moment Frames, 1071

1999 ASCE TRANSACTIONS

Construction

Activity-Based Construction (ABC) Modeling and Simulation Method, 209

Alternative Delivery Approaches for Military Medical Construction Projects, 57

Analysis of Unwanted Fire Alarm: Case Study, 47

Build Operate Transfer Municipal Bridge Projects in India, 924

Comparison of Case-Based Reasoning and Artificial Neural Networks, 127

Concerns with Safety in Design/Build Process, 44

Constraint-Based Support for Collaboration in Design and Construction, 110

Construction Baseline Productivity: Theory and Practice, 201

Framework for Evaluating Bids of Construction Contractors, 910

Fuzzy Optimal Model for Resource-Constrained Construction Scheduling, 132

Impact of Change Orders on Labor Efficiency for Mechanical Construction, 187

Improvement of Management Parameters in Public Construction Agency, 916

In the Palm of your Hand: Digital Assistants Aid in Data Collection, 922

ISO 9000 Quality Standards in Construction, 935

The Master Builder Program: An Integrated Approach to Facility Design and Construction, 1023

Modeling and Analysis of a Concrete Production Plant Using Petri Nets, 129

Monitoring Construction Vibrations (Available in Geoenvironmental Special Issue only), 1432

Multitheuristic Approach for Resource Leveling Problem in Construction Engineering: Hybrid Approach, 168

NIST Research Toward Construction Site Integration and Automation, 24

Perceptions of Process Quality in Building Projects, 907

Planning for Computer Integrated Construction, 133

Public-Sector Design/Build Evolution and Performance, 908

Risk Management Model for International Construction Joint Ventures, 212

Time Series Analysis for Construction Productivity Experiments, 176

Value-Added Assessment of Construction Plans, 195

Who Provides Inspection, 1576

Construction companies

Assessment of Organizational Change for Public Construction Organizations, 925

Establishing a World Wide Web Presence, 1401

Small to Medium Contractor Contingency and Assumption of Risk, 178

Construction control

Construction Control for Earth and Rockfill Dams, 1533

Imposing ISO 9000 Quality Assurance System on Statutory Agents in Hong Kong, 200

Construction costs

Hospitals of Developing Countries: Design and Construction Economics, 48

Window Analyses of Compensable Delays, 177

Behavior of Retrofitted URM Walls under Simulated Earthquake Loading, 158

Durability of AR Glass Fiber Reinforced Plastic Bars, 143

Experimental Comparisons of Connections for GFRP Pultruded Frames, 144

Experimental Results on Centrifuged GFRP Poles for Electric Lifelines, 157

Feasibility Study of Prototype GFRP-Reinforced Wood Railroad Crosstie, 153

Finite-Element and Simplified Models of GFRP Connections, 1113

Glass Rebar's Growing Pain, 1430

Quality Assurance of GFRP Pipes for Seawater Cooling of Power Plants, 145

Glass reinforced plastics

Glass Rebar's Growing Pain, 1430

Global positioning

Determination of Local Geoid with Geometric Method: Case Study, 1198

Improvement of GPS Relative Positioning Accuracy by Using SNR, 1202

Measuring Control Delay at Signalized Intersections, 1238

1999 ASCE TRANSACTIONS

Road Slope Information from GPS-Derived Trajectory Data, 1194

Tailored Datum Transformation Model for Locally Distributed Data, 1192

Tracking the Temblor, 1517

Global warming

Indicators of Impacts of Global Climate Change on U.S. Water Resources, 1307

Glued-laminated timber

Covered Bridge Connection (Available in Structural Engineering Special Issue only), 1444

Northern Red Oak Glued-Laminated Timber Bridge, 93

Partial Composite Action in Hardwood Glued-Laminated T-Beams, 61

Strength of Glued-In Bolts after Full-Scale Loading, 999

Gluing

Strength of Glued-In Bolts after Full-Scale Loading, 999

Goals

Growing Pains, 1460

Partnering Measures, 906

Government agencies

Implementation of Project Management in Public Engineering Organization, 918

Improvement of Management Parameters in Public Construction Agency, 916

Organizing Highway Maintenance Agencies to Maximize Effectiveness, 896

Government role

Public Housing Rents in Hong Kong: Policy and Structure, 1277

Grade control structures

Evaluation of Stream Grade Control Structures in Loess Soil Region, 731

Gradient

Rotational Capacity of Aluminum Beams under Moment Gradient. I: Experiments, 1131

Rotational Capacity of Aluminum Beams under Moment Gradient. II: Numerical Simulations, 1132

Graduate study

A Five-Year Master of Engineering Curriculum, 1014

The Master Builder Program: An Integrated Approach to Facility Design and Construction, 1023

Grain size

Calculation of Bed Changes in Mountain Streams, 669

Sand Shear Band Thickness Measurements by Digital Imaging Techniques, 119

Sediment Transport Velocity by Tracer Experiment at Regla Beach (Spain), 1366

Grain size analysis

Automatic Image Analysis in Evaluation of Aggregate Shape, 122

Grain Size Analysis Pretreatments and Contaminated Sediment Transport, 1382

Soil Particle Size Distribution by Mosaic Imaging and Watershed Analysis, 116

SUBJECT INDEX

Granular materials

- Behavior of Interfaces between Fiber-Reinforced Polymers and Sands, 599
- Cement Treated Marginal Aggregates for Roads, 972
- Erosion of Sediment Beds in Sewers: Model Development, 469
- Fabric Study of Granular Materials after Compaction, 400
- Granular Material Characterization for Mechanistic Pavement Design, 1218
- Micromechanical Modeling for Behavior of Cementitious Granular Materials, 385
- Recent Advances in the Characterization of Transportation Geo-Materials, 1569
- Sediment Threshold under Stream Flow on Horizontal and Sloping Beds, 295
- Structural Response of LVR Flexible Pavements at Mn/Road Project, 1234

Granular media

- Capturing Nonspherical Shape of Granular Media with Disk Clusters, 557
- Measurement of Particle Movement in Granular Soils Using Image Analysis, 121
- Microstructural Modeling for Elastic Moduli of Bonded Granules, 309
- Numerical Modeling of Silo Filling. I: Continuum Analyses, 239
- Numerical Modeling of Silo Filling. II: Discrete Element Analyses, 240
- Scour Below Pipeline in River Crossings, 738

Graphic methods

- Modeling and Analysis of a Concrete Production Plant Using Petri Nets, 129

Graphical analysis

- Bridge Management System for the City and County of Denver, 1408
- Design and Implementation of Versatile Beam Analyzer, 113

Grasses

- Grass ET Estimates Using Penman-Type Equations in Central Sudan, 883

Gravel

- Calibrated Parker-Klingeman Model for Gravel Transport, 709
- Turbulent Velocity Profiles and Boundary Shear in Gravel Bed Rivers, 657

Gravity

- Model and Analysis of Belt Drainage Thickening, 499
- Numerical Model of Sedimentation/Thickening with Inertial Effects, 498

Gravity loads

- On the Wild Side, 1509

Gravity walls

- Dynamic Analysis of Rigid Walls Considering Flexible Foundation, 619

Gravity waves

- Current Effects on Nonlinear Interactions of Shallow-Water Waves, 1349
- Response of Bottom-Mounted Fluid-Filled Membrane in Gravity Waves, 1362

Ground-water flow

Great Lakes

- Fuzzy Relation Analysis for Multicriteria Water Resources Management, 1291
- Institutional and Technical Barriers to Risk-Based Water Resources Management, 1306
- Potential Climate Change Effects on Great Lakes Hydrodynamics and Water Quality, 1567
- Simple Cost Estimator for Environmental Dredging in the Great Lakes, 1356

Greece

- Use of Multicriteria Methods for Assessment of Transport Projects, 1253

Grid systems

- Coordinate Transformations for Using NEXRAD Data in GIS-Based Hydrologic Modeling, 799
- Gradient-Adaptive-Sigma (GAS) Grid for 3D Mass-Transport Modeling, 660
- Turbulent Velocity in Flocculation by Means of Grids, 428

Grillages

- Load Distribution of Existing Solid Slab Bridges Based on Field Tests, 83

Groins, structures

- Longshore Sediment Transport Rate Measured by Short-Term Impoundment, 1343

Ground motion

- 3D Temporal Characteristics of Earthquake Ground Motion at Single Point, 363
- Antiplane Diffraction from Canyon above Subsurface Unlined Tunnel, 312
- Earthquake Ground Motion and Structural Response in Alluvial Valleys, 580
- Nonlinear Ground Response at Lotung LSST Site, 559
- Optimal Use of Viscoelastic Dampers in Building Frames for Seismic Force, 1073
- Pile Responses Caused by Tunneling, 561
- Reduction of Structural Damage by Nonlinear Soil Response, 1039
- Simulation of Homogeneous and Partially Isotropic Random Fields, 373
- SSI Effects on Ground Motion at Lotung LSST Site, 614

Ground water

- Analytical Ground-Water Flow Solutions for Channel-Aquifer Interaction, 869
- Cosolvent-Water Displacement in One-Dimensional Soil Column, 413
- Interpretation of LNAPL Thickness Measurements under Unsteady Conditions, 793
- Predicting Infiltration and Ground-Water Mounds for Artificial Recharge, 822
- Simplified Expressions for Spatial Moments of Ground-Water Contaminant Plumes, 826
- Simulation/Optimization Modeling for Water Resources Management, 1303

Ground-water flow

- Simulation of Spring Management with Quasi-Aggregated Model, 786
- Subsurface Characterization Using Artificial Neural Network and GIS, 126
- Uncertainty of One-Dimensional Ground-Water Flow in Strongly Heterogeneous Formations, 796

Ground-water management

Ground-water management

Development of Multiobjective Management Models for Coastal Aquifers, 1294

Evaluating Data Worth for Ground-Water Management Under Uncertainty, 1317

Preparing for the 21st Century, 1568

Ground-water mounding

Effects of Unsaturated Zone on Ground-Water Mounding, 784

Predicting Infiltration and Ground-Water Mounds for Artificial Recharge, 822

Ground-water pollution

Comparison of Optimization Methods for Ground-Water Bioremediation, 1293

Contaminant Leaching Model for Dredged Material Disposal Facilities, 502

Development of Background Values for Inorganics in Ground Water, 1386

Effects of Water Saturation on Retardation of Ground-Water Contaminants, 486

Nitrate Electromigration in Sandy Soil in the Presence of Hydraulic Flow, 845

Pilot Study Evaluation of Pulsed Plasma Arc Ground-Water Treatment, 1390

Removal of Arsenic from Ground Water by Manganese Dioxide-Coated Sand, 497

Study of Parallel Computation for Ground Water Solute Transport, 782

Water, Water, Everywhere (Available in Geoenvironmental special issue only), 1470

Ground-water quality

Development of Background Values for Inorganics in Ground Water, 1386

In Situ Bioremediation Technique for Sites Underlain by Silt and Clay, 540

Optimal Ground-Water Detection Monitoring System Design under Uncertainty, 587

Removal of Arsenic from Ground Water by Manganese Dioxide-Coated Sand, 497

Transformation of Chlorinated Methanes by Nanoscale Iron Particles, 526

Ground-water recharge

Infiltration Considerations for Ground-Water Recharge with Waste Effluent, 876

Use of Hydrologic Budget and Chemical Data for Ground-Water Assessment, 1312

Grout

Bridge Stay Cable Corrosion Protection. I: Grout Injection and Load Testing, 5

Grouting

Boiling Failure and Resumption of Deep Excavation, 1000

Deep Mixing Technology for Liquefaction Mitigation, 830

Factors Affecting Mechanical and Creep Properties of Silicate-Grouted Sands, 624

For the Duration, 1492

Growth projections

Competitiveness Evaluation for Individual Growth in Hybrid Processes, 420

Guidelines

Guidelines for Evaluating Aging Penstocks, 11

1999 ASCE TRANSACTIONS

Gulfs

Tidal Regime in Gulf of Kutch, West Coast of India, by 2D Model, 1360

Gusts

Design Gust Wind Speeds in the United States, 10

Maximum Daily Wind Gusts Related to Mean Daily Wind Speed, 1080

Gypsum

Lateral Behavior of Plasterboard-Clad Residential Steel Frames, 1033

Half space

Antiplane Diffraction from Canyon above Subsurface Unlined Tunnel, 312

Harbor facilities

Turbulent Flow Induced by Full-Scale Ship in Harbor, 331

Harbors

3D Numerical Simulation of Turbulent Shallow-Water Flow in Square Harbor, 648

Hardness

General Kinematic-Isotropic Hardening Model, 287

Hardening Models and Their Predictions of Material Response, 275

Thermodynamic Formulation of Plastic Work Hardening Materials, 246

Hawaii

Keeping a Low Profile, 1478

Microtunneling under Honolulu, 1436

Modeling Fate of Pathogenic Organisms in Coastal Waters of Oahu, Hawaii, 449

Hazardous materials

Comparative Study of 3D Numerical and Puff Models for Dense Air Pollutants, 424

Hazardous waste

Optimal Routing for Infectious Waste Collection, 458

Performance Analysis for Disposal of Mixed Low-Level Waste. I: Methodology, 431

Performance Analysis for Disposal of Mixed Low-Level Waste. II: Results, 432

Sealed-Container Sampling Tools, 1369

Hazardous waste sites

Bioremediation in the Highway Environment: Three Case Studies, 1527

Development of Risk-Based Remediation Strategies, 1376

Parameter Determination for Engineering Applications of Pneumatic Fracturing Analysis, 1389

Practical Aspects of *In-Situ* Electrokinetic Extraction, 406

Reducing Costs of UST Site Management Using RBCA Strategy, 1379

Remediation Lessons Learned, 1437

Remedy Selection for Cleanup of Uncontrolled Waste Sites, 1370

Hazards

Early Warning System, 1458

Head, fluid mechanics

Problem of Head-Discharge Relationships in 6-Point Staggered Schemes, 655

SUBJECT INDEX

Highway design

Head loss

- Friction Correction Factors for Center-Pivots, 878
- A Review of Flow through Porous Media as Applied to Head Loss in Water Filters, 521

Health hazards

- Control of Hydrogen Sulfide Emissions Associated with Wastewater Treatment Plants, 1371
- Evaluation of Potential Risks from Ash Disposal Site Leachate, 437
- Physiological Demands of Concrete Slab Placing and Finishing Work, 171
- Water- and Excreta-Related Diseases: Unitary Environmental Classification, 440

Heat capacity

- Stochastic Finite Elements with Multiple Random Non-Gaussian Properties, 232

Heat exchangers

- Improvement in Performance of Heat Exchanger Fitted with Twisted Tape, 223

Heat flow

- Modeling the Influence of Heat/Moisture Exchange during Bioventing, 532

Heat transfer

- Effects of Moisture on Warming of Activated Carbon Bed, 539
- Improvement in Performance of Heat Exchanger Fitted with Twisted Tape, 223
- Long-Term Simulation of Thermal Regime of Missouri River, 667

Heating

- Heat Source in Infinite Plane with Elliptic Rigid Inclusion and Hole, 314

Heavy metals

- Adsorption on Carbon and Zeolite of Pollutants from Flue Gas during Incineration, 512
- Ex Situ Electroreclamation of Heavy Metals Contaminated Sludge: A Pilot Scale Study, 518
- Numerical Simulation of Transport of Four Heavy Metals in Kaolinite Clay, 438
- Removal of Heavy Metals and COD by SRB in UAFF Reactor, 465

Height

- Determination of Local Geoid with Geometric Method: Case Study, 1198
- Outlet Scour Modeling for Drop Height Influence, 654
- Prediction of Near Field Plume Characteristics Using Far Field Circulation Model, 666

Herbicides

- Atrazine Removal through Biofiltration, 1388
- Modeling Sorption Behavior of Atrazine on Intact Soil Columns, 871
- Precision Offset Spray System for Roadway Shoulder Weed Control, 1249

Heuristics

- Multiheuristic Approach for Resource Leveling Problem in Construction Engineering: Hybrid Approach, 168
- Robust Water System Design with Commercial Intelligent Search Optimizers, 124

High occupancy vehicles

- Simulating Performance Impacts of Bus Lanes and Supporting Measures, 1251

High strength bolts

- Mathematical Model for Relaxation in High-Strength Bolted Connections, 1119

High strength concretes

- Behavior of HSC Filled Tube Columns under Dynamic Compressive Loading, 1150
- Circular High-Strength Concrete Columns under Simulated Seismic Loading, 1060
- Confinement Model for High-Strength Concrete, 1061
- Crack Width of High-Performance Concrete Due to Restrained Shrinkage, 966
- Design of High-Performance Concrete Mixture Using Neural Networks and Nonlinear Programming, 111
- Durability Scaling of Cracking in HPC Structures Subject to Hygromechanical Gradients, 1105
- Frost Durability of Very High Performance Cement-Based Materials, 960

High Strength Concrete, 1556

- Mechanics of Damage and Constitutive Relationships for High Strength Concrete in Triaxial Compression, 229

- Reliability and Model Accuracy for High-Strength Concrete Column Design, 1062

SUBJECT INDEX

Structural Surgery, 1427
Tangent Stiffness Equations for Laterally Distributed Loaded Members, 294

Lateral pressure
Imperfection Sensitivity of Moderately Thick Laminated Cylindrical Shells, 19

Lattice design
Design and Fabrication of CFRP Interstage Attach Fitting for Launch Vehicles, 28
Steel Latticed Members under Cyclic Axial and Flexural Actions, 1072

Layered soils
Analysis of Load Tests on Piles Driven through Calcareous Desert Sands, 628
Consistent FEM-Vlasov Model for Plates on Layered Soil, 1041
Lateral Vibration and Internal Forces of Grouped Piles in Layered Soil, 545
Settlement, Sliding, and Liquefaction Remediation of Layered Soil, 633
Wave-Propagation Formulation of Seismic Response of Multistory Buildings, 1076

Layered systems
Modeling of Wrinkling in Compression Molding of Composites, 344

Layout
Dynamic Layout Planning Using a Hybrid Incremental Solution Method, 215
Evolution Program for Layout Geometry of Rectilinear Looped Networks, 136
EvoSite: Evolution-Based Model for Site Layout Planning, 131
Wrinkled Membranes and Cable-Stayed Bridges, 65

Leachate collection systems
Contaminant Leaching Model for Dredged Material Disposal Facilities, 502
Field Investigation of Landfill Leachate Collection System Clogging, 1367

Leachates
Evaluation of Potential Risks from Ash Disposal Site Leachate, 437
Prediction of Leachate Quality from Sanitary Landfills, 515
Simulation of Construction and Demolition Waste Leachate, 530

Leaching
Analytical Modeling of Nitrogen Dynamics in Soils and Ground Water, 884
Chemoporoplasticity of Calcium Leaching in Concrete, 375
Contaminant Leaching Model for Dredged Material Disposal Facilities, 502
Laboratory Studies on Remediation of Chromium-Contaminated Soils, 430
Modeling Sorption Behavior of Atrazine on Intact Soil Columns, 871
Subirrigation and Intercropping to Minimize Nitrate Leaching from Corn Production Systems, 852

Leadership
A Course on Engineering Leadership, 1017
